

**Name:** Birmingham

**Location:** Birmingham, AL

**Market:** Municipal

**Application:** Wastewater

**Size:** 10'-6" Dia. x 15.88' Deep Fiberglass Rehabilitation Insert

## PROJECT PROFILE

### Municipal Wastewater Rehabilitation Insert

*This project was a rehabilitation insert for an existing concrete structure. It was a duplex station with 8" stainless steel force main lines. It included an 8" HOPE Suction line that was connected to a diesel powered emergency pump, and an oversized access hatch with a safety grate. The coordination with engineering was extensive and tedious to meet site conditions. Overall this was a standard rehabilitation insert that was delivered on time and within budget.*

## Why work with us?

- ☒ Turnkey Fiberglass Prepackaged Systems
- ☒ Reduced Construction Costs
- ☒ On Time Delivery
- ☒ Superior Quality
