

Name: Congers

Location: Congers, New York

Market: Commercial

Application: Food Processing Facility

Size: 8' Dia. x 8,000 Gallon Grease Trap/Pump Station & 6' Dia. x 6' Deep Valve Vault

PROJECT PROFILE

Commercial Wet Well & Valve Vault

This project was unique due to it being a custom underground horizontal tank that required three interior chambers separated by baffle walls. The purpose of these chambers was to help settle the tank and separate grease and solids. In addition, the tank was made with a VE resin to with stand tempatures of up to 160 degrees fahrenheit. Overall, this project was custom made to fit the exact needs of the customer, it was delivered on time and came with an engineering stamp from a licensed professional.

Why work with us?

- ☒ Turnkey Fiberglass Prepackaged Systems
- ☒ Reduced Construction Costs
- ☒ On Time Delivery
- ☒ Superior Quality
