

Name: Main Island Pump Station

Location: Ft. Walton Beach, Florida

Market: Municipal Wastewater

Application: Collection Lift Station

Size: 14' Dia. x 32' Deep

PROJECT PROFILE

Municipal Wastewater Quadra-plex Wet Well

This wet well serves as a master pump station for the entire Main Island, Ft. Walton Beach, Florida. This station houses a quadra-plex (4) pump system. Each KSB pump weighed 4974 lbs., with an individual pump rating of 174 Hp. The station was engineered for a flooded condition to finish grade, with a bottom deflection not to exceed 3/8". The discharges system was built using 1 0" Sch. 40, 316 Stainless Steel piping, using a vertical discharge.

Why work with us?

- ☒ Turnkey Fiberglass Prepackaged Systems
- ☒ Reduced Construction Costs
- ☒ On Time Delivery
- ☒ Superior Quality
