

**Name:** Mission Hospital

**Location:** Asheville, NC

**Market:** Commercial

**Application:** Fire Supression System Size: 12' Dia. x

**36' St. Wall Saddle Tank**

## PROJECT PROFILE

### Commercial Fire Supresion Saddle Tank

*This 12' x 36' long saddle tank services as an exterior water storage tank for a hospital fire suppression system. Tank features include a 3" insulated jacket with a series of heat trace heater pads with low tern sensors. Tank dimensions were critical to fit an existing hospital garage location. This tank was delivered "on time" and "under budget", meeting the contractors schedule and costs. Each detail of the tank was engineered to include a North Carolina professional engineer stamped set of calculations*

### Why work with us?

- ☒ Turnkey Fiberglass Prepackaged Systems
- ☒ Reduced Construction Costs
- ☒ On Time Delivery
- ☒ Superior Quality
